PROFESSIONAL SUMMARY

B.Tech CSE graduate (2026) aspiring to be a Data Analyst, skilled in Python, SQL (T-SQL), MS Excel, and Power BI. Built three end-to-end analytics projects covering data cleaning, database design, SQL analysis, and interactive Power BI dashboards, all published on GitHub. Infosys Foundation Grade A+ certified with a HackerRank 3-Star Python Badge.

TECHNICAL SKILLS

- **Programming & Query:** Python (Pandas, NumPy, Matplotlib), SQL (T-SQL: joins, CTEs, window functions)
- **BI & Reporting:** Power BI (DAX, Power Query), MS Excel (Advanced Formulas, Pivot Tables)
- **Databases & Analysis:** SQL Server, Relational Modeling, EDA, Data Cleaning & Validation, Statistics, Data Storytelling
- **Tools:** Git, VS Code, Jupyter Notebook

DATA ANALYTICS PROJECTS

Job Market Intelligence Dashboard *Python, Pandas, SQL Server (T-SQL), Power BI (DAX), Git/GitHub*

- Analyzed 2,318 US data and analytics job postings from 1,342 companies (filtered from 123,849 LinkedIn postings) to find which skills, cities, and industries offer the most opportunity for entry-level analysts.
- Cleaned and normalized the data in Python (Pandas), extracted 30 in-demand skills with a regex dictionary, and designed a SQL Server database (primary/foreign keys) with CTEs, window functions (RANK, LAG, PERCENTILE_CONT), and reusable views.
- Built a 4-page interactive Power BI dashboard with DAX measures, synced slicers, and a minimum sample rule for every median salary.
- Found SQL in 50.8% of postings (Python 41.5%), an entry-level median salary of about $111K, and California with the most postings. Published on GitHub.

Netflix Content Analytics Pipeline *Python, Pandas, SQL Server, Power BI, Git/GitHub*

- Cleaned 8,700+ Netflix titles in Python (Pandas), designed a normalized 3-table SQL Server database, wrote SQL trend queries, and built an interactive Power BI dashboard connected live to it.
- Found that the US leads content production, the catalog is about 70% movies and 30% TV shows, additions peaked in 2019, and TV-MA is the dominant rating.

Customer Behavior Analysis *Python, Pandas, T-SQL, Power BI*

- Analyzed 3,900 transactions across gender, discount usage, loyalty segments, and product performance using Python, T-SQL, and an interactive Power BI dashboard.
- Found that male customers outspent female customers roughly 2:1 and Young Adults were the top-revenue group; recommended actions on subscriptions, loyalty programs, discounts, and targeted marketing.

Deloitte Data Analytics Job Simulation (Forage) *MS Excel, Business Analysis*

- Completed a job simulation replicating real-world analytics engagements; translated business questions into analytical tasks using Excel.

INTERNSHIP & CERTIFICATIONS

Python Programming Virtual Intern, CodeAlpha Sep – Oct 2025

- 1-month virtual internship; Certificate of Completion (MSME-affiliated).

Python Web Developer, Infosys Foundation Finishing School (ICT Academy), Grade A+ Feb 2026

- Earned the HackerRank Python 3-Star Badge.

EDUCATION

B.Tech, Computer Science & Engineering (CGPA: 7.60) 2022 – 2026
Swarna Bharathi Institute of Science & Technology, Khammam

Intermediate (MPC), 67.1% — Govt Jr College, Banigandlapadu 2020 – 2022

SSC, GPA: 10/10 — ZPHS, Rajupalem 2019 – 2020
